## SUMMARY

Full Stack Developer focused on shipping deployed web applications for business workflows, SaaS products, and customer-facing platforms. I build React/Next.js frontends, Node/Express APIs, PostgreSQL/Prisma data layers, authentication, dashboards, payments, and production validation workflows.

## SELECTED PROJECTS

### AnselMart - Full-Stack E-Commerce Platform | *React, Vite, Express, Prisma, PostgreSQL* | [Demo](#) | [Portfolio](#) | 2026

- Built a deployed e-commerce platform with catalog, cart, authentication, admin dashboard, order management, Mercado Pago checkout, and operational monitoring.
- Structured the backend around Express routes, service logic, Prisma models, HTTP-only JWT sessions, server-side checkout validation, and database-backed workflows.
- Added quality gates with lint, production build, API smoke tests, and Playwright E2E coverage for checkout/admin flows.

### TurnoFlow - Booking SaaS MVP | *Next.js, TypeScript, Supabase, Stripe* | [Demo](#) | [Portfolio](#) | 2026

- Built a SaaS-style booking MVP for service businesses, with public booking flow, admin panel, service management, business hours, blocked slots, cancellation, and reminders.
- Modeled scheduling around Supabase tables for businesses, services, bookings, and blocked slots, with demo fallback data for local development.
- Added Stripe subscription/billing routes and scheduling tests so the product can be evaluated as a sellable monthly service.

### FinTrack - Personal Finance Dashboard | *Next.js, Prisma, PostgreSQL, NextAuth, Recharts* | [Demo](#) | [Portfolio](#) | 2026

- Built an authenticated finance dashboard with ledger filters, accounts, monthly budgets, savings goals, categories, recurring transactions, and interactive analytics.
- Modeled persistent financial data with Prisma and PostgreSQL, secured sessions with NextAuth.js, and added validation, rate limiting, security headers, and structured logs.
- Added Vitest, Playwright, production smoke checks, Vercel cron for recurring transactions, Web Analytics, and Speed Insights.

### TimeGold - Adaptive Day Planner | *Next.js, TypeScript, Tailwind, Zustand, date-fns* | [Demo](#) | [Portfolio](#) | 2026

- Built an adaptive daily planner that anchors the schedule to the real start time, recalculates delayed blocks, protects sleep boundaries, and tracks category balance.
- Implemented reusable task templates, dynamic schedule calculation, drag-friendly planning UI, local persistence with Zustand, and a lint/typecheck/build delivery gate.

## ENGINEERING EVIDENCE

- **Production delivery:** Public demos, Vercel deployments, environment configuration, build scripts, database setup, and smoke checks where applicable.
- **Backend systems:** Authentication, Prisma/PostgreSQL data models, server-side validation, admin workflows, scheduled jobs, billing routes, and operational monitoring.
- **Business flows:** E-commerce checkout/admin operations, appointment booking/billing, and finance dashboards with budgets, accounts, and recurring transactions.

## TECHNICAL SKILLS

|                  |  |
|------------------|--|
| <b>Frontend</b>  | React, Next.js, Astro, TypeScript, JavaScript, TailwindCSS, Vite |
| <b>Backend</b>   | Node.js, Express, REST APIs, authentication, WebSockets          |
| <b>Data</b>      | PostgreSQL, Prisma ORM, Supabase                                 |
| <b>Delivery</b>  | Git, GitHub, Vercel, Railway, Render, Playwright, Vitest, ESLint |
| <b>Languages</b> | Spanish native, English C1, Japanese A1                          |

## EDUCATION & CERTIFICATIONS

### CS50W: Web Programming with Python and JavaScript

Harvard University (edX)

Mar. 2024 - Jun. 2024

### CS50: Introduction to Computer Science

Harvard University (edX)

Jan. 2024 - Mar. 2024

### Full Stack Developer 2025

ITBA / Santander Open Academy

Jul. 2025 - Nov. 2025

### High School Diploma

Martin Fierro High School No. 10

Dec. 2023
